designed to impress
QUALITY YOU DESERVE

optimum modular

Optimum - stylish, versatile and, above all, totally flexible. The Optimum Range is designed to complement today's audio visual components and provide them with a stand which will look good in any home. The wide choice of models means that whatever combination of sound, cinema, satellite and screen components there are, they will look good together.

All Optimum modular units comprise 4, 6, 8 or 10mm toughened polished safety glass to British Standard BS6206A. They arrive flat packed and are quickly and securely assembled using quality fittings.

With seven finishes and eleven rod heights available plus the choice of clear or smoked glass it is a truly versatile range.

Optimum - it's as individual as you are.

Product codes

Throughout this brochure, you will find product codes. Generally speaking, codes ending 'SL' denote a slimmer depth unit and the number in the second part of the code shows the number of shelves. Remember, you can always vary rod sizes and shelf numbers to create a truly bespoke item. Your dealer will help you to specify a non standard product or contact Optimum Customer Service.

Cable Management Holes

The rear of each shelf in the Optimum Modular Range, with the exception of the Designer range, incorporates a cable management system - a circular hole capable of accommodating several cables of all sizes and standard electric mains' plugs - for neat, tidy wiring. A Cable Sock in black nylon tubing, 1.2 metres long is available to hide those ugly wires and plugs.

Cable Sock

Available in black
1.2 metre lengths

optimum

a choice of finishes

a choice of rod finishes

A comprehensive range of colours and finishes are available for all the Optimum models:

- satin gold
- cherry solid wood
- polished chrome
- satin black
- stainless steel
- polished gold
- light ash solid wood

optimum flexibility

Remember the line diagrams shown on the individual product pages are standard product formats, but the beauty of the Optimum Range is its total flexibility - feel free to vary the shelf heights at no extra cost for a storage unit which fits the components exactly, or add another shelf later for an additional or new size component.

please note

Not all of the rod sizes are available in all of the finishes. Please use the table opposite to check what is available.

Additional Information:

Please fill in the required rod measurements and the overall height in the boxes shown above. Don't forget to add in the glass thickness for each shelf. Start from the bottom and work up. The recommended base rod height is 80mm on all ranges except Premier & Premier Excel where it is a 120mm coned rod.

optimum audio visual 1100mm

AV200 - Polished chrome rods shown here with standard clear 10mm glass.

The Audio Visual 1100mm Range

The Audio Visual 1100mm Slimline and Standard range are simple and elegant. With the choice of seven finishes, eleven different heights and 10mm clear or smoked glass, a tailor made home for all your audio visual components can be created. It complements the latest plasma and LCD televisions and brings all components into one stylish digital entertainment system. The slimline version is superb for today's slim finished units, whereas the standard unit is perfect for deeper audio visual components.

Modular Spares

Whether you want to replace a damaged part, be that glass or rods, add a new shelf, or even change all the rod finishes on an existing stand, Optimum can help you.

The problem with some audio visual stands is you can not add a shelf, or even change the existing spacings on the shelves you have. With an Optimum Modular stand you can simply buy a Shelf Module, which includes three, four or five rods of any length from the range and a fitting kit. You can also replace new length rods to raise or lower a shelf to the new height you desire.

For any assistance on any of the above queries please contact the Customer Service Team at Optimum.

OPT490 - A display stand showing both the standard clear and smoked 8mm glass and all the different rod finishes.

luxury heavyweight top caps

If you change the finish of your stand don't forget to order the corresponding matching top caps.

rod finishes

You can change the finish on your Optimum Modular stand at any time. Finishes available are Satin Gold, Cherry Solid Wood, Polished Chrome, Satin Black, Stainless Steel, Polished Gold and Light Ash Solid Wood.

glass finish

All Optimum Modular stands are available in either clear or smoked glass.

OPT4000 - Satin black rods shown here with standard clear 6mm glass.
